Signing into your account using phone call verification

Once you have setup multi-factor authentication please follow the instructions to sign-in to your Single Sign-On (SSO), using phone call as a verification method. This guide assumes that the default authentication method is set to phone call.

1. Select your account at the Single Sign-On (SSO) page

   ![Microsoft](image)

2. Enter your password and click Sign in

3. The Approve sign in request screen will be showing. You will receive a phone call.

   ![Approve sign in request](image)

4. Answer the call, listen to the automated message, and press the # key to verify your identity and complete the process.

5. You will now be logged into your account.
